FACE LIFT ACTIVATOR

ACTION:

The Activator combined with the Lift Powder creates a mask that tightens and tones the sub-dermal muscles.

This process is accomplished by a penetrating effect that reaches the sub-dermal layers of the skin and causes an increase in blood circulation.

As blood circulation increases, you will notice a subtle pulsating effect taking place. This is a result of the muscles in your face contracting.

The muscles in your face are no different from the ones in your arms or legs. As muscle fibers contract they begin to tighten and firm up. As the muscles become firm, the skin is forced to follow. The same is true when you go to the gym. As you tighten and firm unused muscles, they begin to contract and you feel firm and tone.

The skin isn't just left behind. Its elastic properties allow it to tightly fit to your newly toned muscles. Along with diminishing expression lines this regimen cleans the pores, lubricates, and moisturizes the skin.

INDICATION:

1. Instantly lifts and tightens less firm areas of the face and neck.
2. Temporarily diminishes the appearance of lines and wrinkles
